

Sangamon County Broadband RFI
Question and Response

Q: The ISP is having some difficulty precisely determining the exact locations falling within the various project areas. Are the project areas exactly the same as in the 2023 RFI? If not, could we get either an address list or maps more clearly showing street names and other reference points?

A: No, the area for eligibility was determined from the IOB BEAD eligibility data and is not the same as the 2023 RFI. The data provided did not provide location-specific information, as providers should have access to their own addresses or locations. We did, however, provide the eligible areas in three different formats: PDF, shapefiles, and a KMZ. Your team should be able to determine more precise locations of streets, either the shapefiles or KMZ provided.
